

asb marketing

Due to their ongoing success the promotional product company, ASB Marketing required new offices to incorporate their expanding business.

The company needed more office space and a solution that would provide value for money as well as potential for future expansion. The project resulted in the design and construction of a dynamic 320m2 complex comprising office, showroom and warehouse storage.

The fitout is a contemporary design with elegantly curved walls and desks that soften the typically hard edged office environment. The unusual floor covering in the foyer contributes to an exciting first impression of the surroundings. The sleek furniture and bold use of purple and yellow creates a bright and spacious work setting entirely suited to the client's profile. The entire project was completed on time and to the total satisfaction of the client.

"We have had many national suppliers visit and comment on the quality and design of our office. The whole process was completed on time and to our total satisfaction. The quality of the showroom has allowed us to expand our business and I am more than happy to speak to anyone about our experience with TPS."

Andrew Bloom
DIRECTOR ASB MARKETING
